Statement of Significance

Last updated on - May 19, 1999

The Hughes Creek Bridge on the Hume Highway at Avenel was erected in 1859 by the Board of Land and Works, and replaced a timber bridge erected in 1847. The contractor was Hugh Dalrymple. It is constructed in rusticated sandstone and comprises six segmental arches supported on piers. The restrictive width of the bridge resulted in the construction of a new bridge over Hughes Creek in 1970.

This is a fine example of nineteenth century bridge design. It is superbly constructed and stands as a monument to the early stonemasons and road engineers of Victoria. It is well composed and articulated by rusticated voussoirs, imposts and string courses and is notable for its number of arches. The fine quality stone and stonework is a distinctive feature. The bridge is picturesquely situated in a park-like setting.

The Hughes Creek Bridge survives intact and shows little sign of structural decay. It is presently used solely for pedestrian traffic.

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must **notify** the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).
