Statement of Significance

Last updated on - June 24, 1999

The Port Melbourne Swallow & Ariell Factory occupies the majority of the block bound by Stokes, Rouse, Princes and Beach Streets. The Swallow & Ariell Steam Biscuit Manufactory was first established by Thos. Swallow in 1854 (Thos. Ariell became a partner later that year, and prior to 1858, occupied rented premises opposite the present building).

The complex was built in stages with the earliest building being the three-storey section on the corner of Stokes and Rouse which was built in 1858. This building originally was constructed of face brick with rendered dressings. It was later totally rendered and the ground floor fenestration removed in recent years to accommodate a freezing room in that area. The factory was extended in stages along both Stokes and Rouse Streets in two-storey additions in the 1870s and 80s. As part of this extension a malthouse in Stokes Street was acquired from John Burley Morton in 1876 and refaced to match the existing section. The Rouse Street elevation was completed with a three-storey building at the corner of Princes Street to match the original building in scale. The second major phase of the building was at the corner of Stokes Street and Beach Street early in the 20th century.

A building designed by Gordon McRae was constructed in Stokes Street in 1911 and the building at the corner of Beach Street was designed by Bates Peebles and Smart in c 1922. The space between these two was filled by a loading bay which appears to date from the 1940s. Internally the ground floor has been totally modernised. The Swallow & Ariell complex is of historical importance as the first industrial establishment of its type in Victoria and displays a continuum of architectural styles between the 1850s and the early 20th century. The scale of the structures dominates its surrounds and presents a unified facade around the block.

[Source: Report to the Minister]

The Swallow & Ariell factory, bounded by Rouse, Stokes and Beach Streets,

Port Melbourne, is of historical significance as the oldest and largest biscuit manufacturing complex in Victoria until its absorption by Arnott's Biscuits in 1964. The factory was established in 1854 and by 1883 it was described at the royal commission into the tariff as the fifth largest factory in the world.

(criterion b.2)

The facades of the factory, with their extensive signage and use of Swallow symbols are an important example of corporate advertising which describes the processes and products of Swallow & Ariell from the 1850s to the 1950s.

(criterion d.2)

The Swallow & Ariell factory is of considerable historical significance as a largely externally intact industrial complex. The surviving buildings demonstrate an uninterrupted sequence of development in factory design to accommodate changing processes of production from 1858 to 1984. It has a strong association with the history of manufacturing in Victoria. The growth of Swallow & Ariell and its later absorption by Arnott's biscuits, reflects the general development of manufacturing in Victoria and its eventual decline, particularly after the Second World War. (criteria d.2 and a.4)

The Swallow & Ariell factory, established initially as a manufactory of ships' biscuits, and later supplying products to a large domestic and overseas market, has a strong association with the history of Port Melbourne and the important economic and cultural role Port Melbourne played in the development Melbourne as a link between Victoria and the rest of the world. (criterion a.4)

The foundations and supporting structure of the reel oven, used exclusively in the production of Uneeda biscuits (situated at the rear of building 5), are important evidence of the production processes at Swallow & Ariell.

(criterion b.2)

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must [notify](#) the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).
