Contextual History:History of Place:

Heritage Inventory History of Site:

The Elaine field was cited as the chief feature of the Steiglitz Mining Division in March 1873, with several reefs being worked by small co-operative parties; one of the most successful being the Minerva. Another company, the Lindsay, sunk to 325 feet. Elaine did not develop in a major gold field, though it was reworked from time to time. The concrete foundations belong to a company, which would have probably operated during, or after, the 1930s mining revival.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
