### Statement of Significance

Last updated on - June 1, 1999

What is significant?

The Brighton Beach Railway Station was built in 1889 by contractor Donald Swanson to drawings prepared by George Sims, Senior Draughtsman, Engineer-in-Chief's Branch, Victorian Railways Department. This station replaced the original timber structure built when the railway was extended from Windsor to Brighton Beach in 1861 by the St Kilda & Brighton Railway Company. Various amalgamations of the private railway companies led to the formation of the Melbourne & Hobson's Bay United Railway Company by 1865. This company operated the Brighton railway until it was purchased by the Victorian government in 1878. A second curved platform was added for the extension of the Brighton line to Sandringham in 1887.

How is it significant?

The Brighton Beach Railway Station complex is of architectural, historic and social significance to the State of Victoria.

The station is an extraordinary example of a building type. The imposing, unusually shaped station was built in the wedge shaped area between the converging tracks of the original terminus and the curved extension to Sandringham. It is the key building on the line, setting the tone for other stations at North Brighton and Prahran. Many of the architectural details are unique in railway design. In particular, the pedimented entrance porch, the patterned brickwork, the tiled frieze below the eaves cornice, the bluestone columns at the barriers, the tessellated paving to the entrance lobby, the round brick arches and the additional red brick banding at the entry demonstrate outstanding craftsmanship and decoration.

The Station has cultural and social associations with the development of leisure in Victorian society. The close proximity of station and sea reflects the important role that the railway played in Brighton becoming one of Melbourne's favourite seaside resorts by the latter part of the nineteenth century. The adjacent Terminus Hotel helped foster Brighton Beach as a resort station. The opulent nature of the station demonstrates cultural and social associations with the emergence of Brighton as an affluent and fashionable suburb by the 1880s. The Brighton Beach railway served as a catalyst for both the residential and commercial development along its route.

The Station has an association with the early history of the railways in Victoria, especially the initial phase of private suburban railway building. The St Kilda and Brighton Railway Company was formed in 1857 and ran a line from the St Kilda terminus of the Melbourne & Hobson's Bay Railway Company to Windsor in 1859, extending it to Brighton Beach in 1861. The railway line was operated by the Melbourne & Hobson's Bay United Railway Company from 1865 until 1878 when it was purchased by the Victorian Government. This company, initially known as the Melbourne & Hobson's Bay Railway Company, was the most successful of the private companies and responsible for the first steam railway, from Melbourne to Sandridge in 1854. It emerged phoenix-like as the Melbourne & Hobson's Bay United Railway Company in 1865 after absorbing the Melbourne Railway Company, which had purchased the Melbourne & Suburban Railway Company in 1862, and the St Kilda & Brighton Railway Company.

### Permit Exemptions

**General Exemptions:**

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must **notify** the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.
