Statement of Significance

Last updated on - December 19, 2003

What is significant?

The Mount Rouse Quarry is located on the north-east face of Mount Rouse. It is supported by plant and equipment and functional buildings. The quarry mines bluestone which has been used in the construction of many houses, roads and other structures throughout the Shire of Southern Grampians. There appear to have been at least five quarries on Mount Rouse. It is not known when the various quarries were first opened.

How is it significant?

The Mount Rouse Quarry is of historical and scientific significance to the Southern Grampians shire and to the township of Penshurst.

Why is it significant?

The Mount Rouse Quarry is of historical significance as a major employer and as the source of the material for

buildings, roads and railways and of scientific significance for the exploitation of a natural resource from an early period.

Physical Conditions

not applicable.

Physical Description 1

The quarry is located on the north-east face of Mount Rouse, and removes bluestone from the side of Mount Rouse. The bluestone has been used to construct almost all the stone buildings in and around the township, as well as the roads. The Mount Rouse Quarry is supported by plant and equipment and functional buildings. Access is gained from the eastern end of Ritchie Street.

Historical Australian Themes
