C Listed - Local Significance

The house at 268 High Street is aesthetically significant at a LOCAL level. Although partially altered, it still demonstrates original design qualities of the interwar Californian Bungalow style. These qualities include the dominant gable roof form, together with a minor gable that projects towards the street frontage. Other intact qualities include the horizontal weatherboard wall cladding, galvanised corrugated iron roof cladding, wide eaves, paired timber framed double hung windows, flat roofed corner verandah porch supported by a timber post? and a painted brick pier with a concrete capping, timber balustrade, and the decorative gable infill (ventilator, brackets, battening and panelling).

The house at 268 High Street is historically significant at a LOCAL level. It is associated with the Belmont Hill Estate subdivision of 1911.

Overall, the house at 268 High Street is of LOCAL significance.

Physical Description 1

DESCRIPTION

The house at 268 High Street has typical front and side setbacks, which are shown on the 1960 GWST Plan of Drainage.³ The front yard is characterised by a number of trees and shrubs.

The asymmetrical, single storey, horizontal weatherboard, interwar Californian Bungalow is characterised by a dominant gable roof form, together with a minor gable that projects towards the street frontage. These roof forms appear to be clad in galvanised corrugated iron. Wide overhangs are a feature of the eaves. The early timber framed double hung windows are arranged in pairs on the street facade.

A feature of the design is the flat roofed corner verandah porch. It is supported by a timber post? which in turn is supported by a painted brick pier with a concrete capping. A timber balustrade forms the verandah porch boundary.

An early decorative feature of the design is the gable infill (ventilator, brackets, battening and panelling).

An attic floor and window appea
