Statement of Significance

Last updated on - July 10, 2008

LOCAL SIGNIFICANCE: The Maddingley No.2 mine was a large-scale brown coal mining operation supplying coal to Victorian industry, but its heritage significance has been reduced by its use as a waste dump, eroding its visual qualities.

Interpretation of Site	The site is clearly one of large-scale open cut mining, but use as a waste dump has eroded its value as a strong visual site.

Property Number	

History

The Maddingley No 2 coal mine was begun in March 1948 about 1.5 miles south of the No 1 mine, commenced in 1944. Maddingley No 2 supplied coal principally to the APM operation at Fairfield in Melbourne, and its peak annual production occurred in 1954, at just over half a million tons. After 1967 production fell away, and APM took over operations in 1970. After 1989, operation by a new company took out only small quantities for local use.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
