Statement of Significance

Last updated on -

What is significant?

The Miller Street Tramway Bridge, to the extent of the surviving c.1920s fabric, which includes the brick abutments on either side of the Whittlesea railway is significant.

The post-1945 alterations and additions including the concrete deck, supporting piers and cyclone wire fencing are not significant.

How is it significant?

The Miller Street Tramway Bridge is of local historic significance to Darebin City.

Why is it significant?

Historically, the Miller Street Tramway Bridge is significant as the only dedicated tramway bridge in Melbourne. It provides evidence of the significant improvements made to the electric tramway service by the MMBW during a major expansion of the network and demonstrates the policy of requiring grade separations between trams and railways, wherever possible. (AHC criteria A.4, D.2, H.1)

Physical Description 1

A road over rail bridge, which now contains two tramlines. The bridge appears to have been altered and extended on the west since it was originally constructed and now also spans a roadway associated with the adjacent Tramway Depot. The brick abutments on either side of the Whittlesea railway appear to be part of the original construction. The reinforced concrete deck and supporting piers appear to be later. The bridge is enclosed by high cyclone wire fences.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
