Physical Description 1

This tree is a large mature specimen of good form and in good health. It is located in the road reserve in the precinct of the Hurst family cemetery and Allwood.

ELTHAM STUDY DESCRIPTON:

This tree is a large mature specimen of good form and in good health. It is located in the road reserve in the precinct of the Hurst family cemetery and Allwood.

REVISED OR EXTENDED DESCRIPTION:

The tree is 800-900mm diameter and 21m high; it is located at 340426E, 5832694E in front of the Hurstbridge Child & Maternal Health Centre.

'Platanus x acerifolia' 'Used as a street tree for many years, this fast-growing species can reach 120 ft (36 m). It can withstand poor conditions and is resistant to leaf blight; however, the roots can lift paving and the large, bright green, leathery leaves can block small drains. Its straight, erect trunk is attractively blotched in grey, brown and white' { Botanica}.

Physical Conditions

Good (partially disturbed, well preserved)

Integrity

Substantially intact/some intrusions
