Location

Wombat Park Malmsbury Road, DAYLESFORD VIC 3460 - Property No T11528

Municipality

HEPBURN SHIRE

Level of significance

State

Heritage Listing

National Trust

Statement of Significance

Last updated on - February 21, 2005

Location or Context: Historic Garden or Park.

Rare or Localised: 1-10 known specimens.

A species rare in cultivation in Victoria, this tree is by far the best example. Other known examples occur as a seedling 3 metres high north of the house and a stunted tree south of the Nursery in Eastern Park, Geelong. The tree has multiple leaders and in the past year has set a very heavy crop of cones. The tree is native to Mexico, Arizona and California and produces edible seeds. The garden at Wombat Park was identified in Peter Watts 1980 study at being of State significance. The tree is located on driveway towards house, near the tennis court

Measurements: 27/09/1988

Spread (m): 7.8

Girth (m): 1.71

Height (m): 18.5
Estimated Age (yrs): 100
Condition: Good

Access: Restricted
