## Statement of Significance

Last updated on - June 16, 2008

Rare or localised

This stand is the most southerly occurrence of the species which has a range that extends to Queensland. It is Victoria's only palm species and occurs in small populations along Cabbage Tree Creek, and growing in association with *Acmena smithii* and *Eucalyptus botryoides*. Palm measured is beside track. There appears to be little regeneration.

The trees are located in Cabbage Tree Palms Reserve, approximately 200m from the entrance along the track.

Measurements: 16/10/1993

Spread (m): 3.2

Girth (m): 0.91

Height (m): 12.2

Estimated Age (yrs): 100

Condition: Good

Access: Unrestricted

Classified: 11/11/1993

Other Names      Cabbage Fan-Palm,

Hermes Number    70522

Property Number
