Statement of Significance

Last updated on - June 11, 2004

Horticultural value
Historic garden or park
Rare or localised

A small tree with a very dense crown, attractive foliage and large fruits, 1 cm in diameter which turn from lime green to black. This tree is the only known example of the species in Victoria. The tree would benefit from removal of deadwood and a management program. This species forms an attractive small tree which is worthy of wider cultivation.
