Statement of Significance

Last updated on - June 8, 2004

Contribution to landscape of historic garden
Rare or localised
Outstanding example of species.

This species occurs from southern Victoria through NSW to Fraser Island in Queensland, often in areas where rainforest interfaces with moist open forest. It is rare in cultivation in Victoria and the only other known examples are 13 trees in the Royal Botanic Gardens.

2004: Some damage on trunk.

01/2013 In poor condition with severe die- back

Measurements: 02/1986

Spread (m): 9.4
