Statement of Significance

Last updated on - June 8, 2004

Localised distribution

This tree is the only known example of *Pinus gerardiana* in cultivation in Victoria. The tree has an attractive form with needles occurring in threes, 8-12 cm long and cones 10-20 cm long and 8-12 cm wide, similar to *Pinus roxburghii*. The bark is very attractive, grey and scaly, peeling off to reveal green patches. It is a native of the Himalayas, occurring on the borders of Kashmir, Tibet and Nth Afghanistan and produces edible nuts.

Measurements: 03/08/1988

Spread (m): 9
