Location

Camperdown Botanic Gardens, Cnr Park Road and Park Lane., CAMPERDOWN VIC 3260 - Property No T11452

Municipality

CORANGAMITE SHIRE

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 16, 2008

Contribution to landscape of historic garden
Rare or localised

These trees are located east of Burn's statue and near picnic shelter. They are two fine examples of an Oak rare in cultivation in Victoria. The normal range for *Quercus lanata* is the East Asian Himalayas from Pakistan to Eastern Nepal. The trees are particularly attractive due to their form, silver colouring on the underside of the leaves and their light coloured wood. Other known specimens occur at the Royal Botanic Gardens, Kyneton, Hamilton and Mount Macedon.

Species formerly known as *Quercus leucotrichophora*.

Measurements: 03/1987
Spread (m): 10
Girth (m): 1.4
Height (m): 11
Estimated Age (yrs): 70
Condition: Good

Measurements: 26/01/2004
Spread (m): 10
Girth (m): 1.5
Height (m): 11
Estimated Age (yrs): 97
Condition: Good

Measurements: 01/2013
Spread (m): 9
Girth (m): 1.75
