Statement of Significance

Last updated on - January 7, 2008

Contribution to landscape of historic garden
Rare or localised

Outstanding size.
Outstanding example of species.

This species is native to the coastal open forests near the Victorian border to Newcastle, NSW and rare in cultivation. The only other examples known in cultivation are at Tonghi Creek State School, East Gippsland. *E. longifolia* is a member of the myrtle family and has thick, fibrous bark usually colored light gray and white, with long narrow grey-green leaves. The drooping flowerheads in groups of three are a distinguishing feature. Located near old Kiosk.
