Statement of Significance

Last updated on - December 4, 2006

What is significant? The pipework, action, windchests, wind system, console and casework of the pipe organ built in 1858 by John Courcelle.

How is it significant? The organ is significant for historic and aesthetic reasons at a regional level

Why is it significant? The pipe organ at the Church of Christ, Geelong is significant for the following reasons:

- It retains its original mechanisms and wind system
- It retains its original casework
- It retains all of its original pipework, except for one rank, later replaced by a Gamba
- It is one of several organs known to have been exported by Courcelle to Melbourne and Geelong in the late 1850s and early 1860s
- It is the only Courcelle organ remaining in Geelong in close to original form
- It is the oldest surviving organ in Geelong
- It clearly shows the influence of English organ builder J.C. Bishop in its construction, with whom Courcelle had worked.
