Heritage Inventory History of Site:

PENTAGON Co.

05.04.1895: depth is 126 feet, water is heavy at 2500 gallons per hour, present appliances are not coping.

10.05.1895: bottomed Thursday prospects good.

17.05.1895: pumping after repairing the Tangye pump; shaft has touched the reef.

24.05.1895: iron boxes removed from shaft and sinking in reef.

14.06.1895: tangye engine out of order.

22.08.1895: Pentagon Co., registered in 20,000 shares under the N.L. Act , purchasing an engine and pumping plant.

30.08.1895: half yearly meeting: agreed to sell some of the present plant and purchase a 10 inch lift pump

capable of throwing 12,000 gallons of water per hour, a 16 foot by 6 foot 6 inch Cornish flue boiler and a 14 inch cylinder engine to add to the 8 inch double cylinder winch already at the mine.

09.05.1896: purchased the pumping equipment capable of raising 12,000 gallons per hour which consists of an 11 inch draw lift pump, a 14 inch horizontal engine and a 60 hp Cornish flue boiler with galloway tubes fitted; the equipment was supplied by Messrs Miller & Co. of Ballarat and was installed by Mr. W. Munro; the shaft has been lengthened by 2 feet to 9 feet giving one pumping and two winding compartments.

01.06.1896: total depth of shaft is 80 feet.

25.12.1897: mixed results during the year which saw a small yield of only 449 ozs 6 dwt 6gr; good prospects early in the year prompted the company to purchase two steam powered iron puddlers, at a cost of £800; results with iron puddlers were encouraging but the capital became exhausted and operations were suspended; a meeting of directors agreed to raise the necessary capital; pending the resumption of work only 3 engine drivers and the manager have been employed; when fully operational the mine employs 70 men and the wages bill is £400; the company leases 40 acres but has only worked 4 acres; yield for the year of 449 ozs 6 dwt 6gr.

1898 to 1899: recorded production of 2153 ozs 16 dwt (or 66.992 kg).
