Statement of Significance

Last updated on - May 15, 2006

This structure is of historical significance relating to early construction and development of stations along the Melbourne-Sydney Railway

Interpretation of Site	Historical plans indicate that there is potential for further sub-surface deposits. The features listed on the plan must have been removed prior to 1966, as these structures are not distinguishable in an aerial photograph of the station taken in that year.
Hermes Number	14328
Property Number	

History

The station was originally opened as Kilmore Station on 18 April 1872. Refreshment rooms and a watering place

for trains were built in 1873 and located on the down side of the railway. A goods shed was also located on the down side of the railway. In 1878, a large timber station identical to that at Wallan was built, before being replaced in 1939 by the current structure on the down platform. Timber loading ramps and sidings were also added to the station in 1878. The up platform was built in 1886. Watering facilities for the trains were also located on the up side of the railway. On 1 October 1888, the station was renamed Kilmore East, as a Kilmore station was constructed within the Kilmore township itself.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
