Location

Taradale Public Park, Metcalfe - Taradale Road, TARADALE VIC 3447 - Property No T11920

Municipality

MOUNT ALEXANDER SHIRE

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on -

Rare or localised

The Taradale Public Park contains two *Pinus sylvestris* (one in poor condition). It is probable that these were planted in 1863 as a number of ornamental trees planted then are noted in the reserve file. This species is rare in cultivation in Victoria, the only other known examples occur on the old Beechworth Hospital site and the Royal Botanic Gardens.

Pinus sylvestris is native to Europe and Asia, ranging from Scotland, Ireland and Portugal in the west, east to eastern Siberia, south to the Caucasus and as far north as well inside the Arctic Circle in Scandinavia. It is readily identified by its combination of fairly short, blue-green leaves and orange-red bark

Measurements: 10/1985
Spread (m): 11
Girth (m): 1.77
Height (m): 13.5
Estimated Age (Yrs): 122
Condition: Good

Access: Unrestricted
Classified: 10/10/1985

Other Names Scotts Pine,

Hermes Number 161836
