Statement of Significance

Last updated on -

Particularly old
Outstanding size

This Golden Poplar (*Populus x canadensis*) is located on the northern lawn of the Melbourne Zoological Gardens, established in 1862, and one of State's most treasured gardens. The gardens are not only home to thousands of animals but also approximately 70,000 plant specimens.

The Golden Poplar makes an important contribution to the landscape. The tree is located in open space and is of outstanding size for the species. It is particularly old and is indicative of the mature plantings at the Zoo.
