## Heritage Listing

Victorian Heritage Inventory

---

Interpretation of Site	Mount View Mine Shaft and Adit used during the late 19th Century and associated with the Maldon Goldfields.
Hermes Number	193570
Property Number	

---

## History

The Mount View mine was one of the minor operations on the Maldon goldfield, It had a relatively short working life and consequently research material is scarce.

The Victorian Mining Bibliography has no entries for the Mount View mine. The only official production record found in VicMine is for the Mount View Shaft (VicMine 10 368993) which produced 33 ozs from 267 tons of ore It is assumed that these statistics are understated.

No official production statistics were found for the lower ad it which presumably, if only due to the extent of the workings, would have been a bigger gold producer than the shaft.
