## Statement of Significance

Last updated on - March 29, 2022

### What is significant?

Contribution to landscape of historic garden

This specimen was planted by the gardeners/patients in the Fern Courtyard at the hospital.

Mayday Hills Hospital was developed as the Beechworth Lunatic Asylum in 1864-67 with gardens and grounds laid out at this time and rejuvenated since 1913.

The collection of mature trees and plants is exceptional with many dating from the mid to late nineteenth century and others from the post 1913 work of Hugh Linaker and later curators. The efforts of grounds staff over the decades has created a succession plan that extends beyond the lifespan of the 19th century plantings.

It has become one of the top 5 collections of trees in Victoria (*John Hawker*)

Measurements: 11/03/2013

Height (m): 8

Canopy Spread (m): 7

Girth (m): 0.75  
Estimated Age (yrs): 40  
Condition: Good  
Access: Unrestricted  
Classified: 05/03/2014

Formerly listed as Crataegus monogyna (Hawthorn) - Species changed 29/03/2022
