Statement of Significance

Last updated on -

Remnant (Scientific)

Landscape (Social)

Species/Location (Aesthetic)

This River Red Gum is significant at a Regional level for its contribution to the landscape, for aesthetic significance as a better than average example of its species in its location, and as a remnant tree. The tree is an aesthetically-pleasing specimen with a spreading canopy that touches the ground, and it makes a fine contribution to the pastoral landscape against the backdrop of the You Yangs Historic Park. It is also the most

aesthetically pleasing of the many River Red Gums that line Hovells Creek at Woolloomanata.

Measurements: 2015

Spread (m): N-S 30.4, E-W 30.1

Girth (m): 5.1
