
Eucalyptus pauciflora

Snow Gum, Mt Stirling 01

Snow Gum, Mt Stirling 02

Location

Summit Track MOUNT BULLER, MANSFIELD SHIRE

Municipality

MANSFIELD SHIRE

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - July 21, 2016

Remnant (Scientific)

Landmark (Social)

The Mount Stirling Summit tree is significant at a Regional level as a landmark specimen. It is the only tree on the Mount Stirling Summit Area of about 23 hectares. The tree is remarkable for its large size given its high altitude at 1725 metres ASL, its great age, and its solitary prominence in the landscape. The Stirling Summit Tree is an icon of Mount Stirling, and an attractive feature for bushwalkers, cross country skiers, horse riders, photographers and others who visit Mount Stirling.

Measurements: 2015

Circumference (m): 3.35

Height (m): 51.5

Spread (m): N-S 10; E-W 8

Estimated Age: 300+

Condition: Good

Access: Restricted
