Statement of Significance

Last updated on - January 1, 1900

What is significant?

This large Mountain ash grows near the South Cascades, 200m off Thomson Valley Road in Baw Baw. It is one of a set of large old growth trees in Victoria. This tree is included in a stand of trees also on the register (T11974).

How is it significant?

This Mountain ash (*Eucalyptus regnans*) is significant for scientific reasons at State level.

Why is it significant?

This Mountain ash is outstanding for its size, with a height of 75.5m, spread of 30m and girth of 30m. It is an outstanding example of the species as a huge tree with a massive and full crown, a slow tapering trunk with little fluting or buttressing. This tree has a small scarf cut into trunk, about 1.5m above base on NW side.

It is one of a set of large old growth trees in Victoria also on the register (T12342, T12343, T12344, T12345, T12346, T12347, T12348, T12349, T12350, T12351, T12357, T12358).

Measurements: 29/12/2010
