## Statement of Significance

Last updated on - January 1, 1900

Tree Measurements:

Condition: Good

Tree Type: Individual

Circumference: 1.65m

Height: 40m

Canopy spread: N-S: 25m E-W: 23m

Height method: Instrument

Circumference method: Tape Measure

Date of measurement: 09/2018

Age of tree: approximately 200+ years

Measured by Justin Herbert

## STATEMENT OF CULTURAL HERITAGE SIGNIFICANCE

What is significant?

A large *Eucalyptus tereticornis* (Forest Red Gum) located in the school grounds of Nagle College in Bairnsdale.

How is it significant?

The *Eucalyptus tereticornis* (Forest Red Gum) is significant for scientific, social and aesthetic reasons at Regional level.

Why is it significant?

This *Eucalyptus tereticornis* (Forest Red Gum) is an outstanding example of the species with excellent form and a height of 40m, circumference of 1.65m and spread between 23-25m. The Nagle College site was built in the 1980s, and was chosen due to the significance of this existing Forest Red Gum specimen. The tree is seen as an icon of the school, with students propagating seedlings from it each year that are given to departing year 12 students on graduation. There is another example of *Eucalyptus tereticornis* located at the nearby Bairnsdale Secondary College (T11287).

Other Names      Forest Red Gum,

Hermes Number    202813
