Statement of Significance

Last updated on - February 18, 2021

This is likely an archaeological site which relates to the early european occupation of Melbourne. It is significant as a record of a relatively later Melbourne subdivision in response to the effects of the goldrush.

Interpretation of Site	Adjacent excavations at 192 A'Beckett Street uncovered a wall feature that previously extended into the address, but is cut by modern footings. Although the Melbourne clay level is shallow, footings of the previous buildings including Landell's 1860s property are likely to survive.
