Statement of Significance

Last updated on - July 18, 2023

What is significant?

An individual Blackwood Wattle growing in a valley on a private property close to the Snowy River National Park.

How is it significant?

This Blackwood Wattle is significant for scientific reasons at the Regional level.

Why is it significant?

This Blackwood Wattle is scientifically significant for its large size particularly in this region. It is a dominating tree located in the clearing of a valley with smaller Blackwood Wattles growing peripherally. It is significant for its contribution to the habitat. The tree is a landmark and may be used in the future for seed collection.
