Location

2/21 WORWONG AVENUE SOMERVILLE, MORNINGTON PENINSULA SHIRE

Municipality

MORNINGTON PENINSULA SHIRE

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - December 21, 2023

What is significant?

An individual Rough-barked Manna Gum growing on a Council owned nature strip. There are two trees, only one (the largest) is classified as significant.

How is it significant?

The single Rough-barked Manna Gum is significant for scientific and landscape reasons at the Regional level.

Why is it significant?

This Rough-barked Manna Gum is scientifically significant for its outstanding size (for this particular subspecies) in the Mornington Peninsula region. This subspecies is usually stunted and smaller but this specimen is unusually large. The tree is also significant for its contribution to the landscape. It is one of two possible remnant specimens persisting in an urbanised environment. The tree may potentially be a good source of seed stock for revegetation purposes in the area.

Measurements: 11/11/2022

Spread (m): 18, 14

Girth (m): 4.79

Height (m): 18

Estimated age (yrs): 110

Condition: Good

Access: Unrestricted

Classified: 28/08/2023
