Manningham City

Statement of Significance

Last updated on -

The row of 35 *Pinus Radiata* along the eastern side of High Street, Doncaster are considered to be locally significant as a remnant windbreak planting dating back to the orcharding history of Doncaster. Positioned within the front gardens of houses 126-138, the trees form a strong element in the streetscape.

Heritage Study/Consultant	Manningham - Heritage Garden & Significant Tree Study - Stage 2, John Patrick Pty Ltd, 2006;
Other Names	Pinus radiata,
Hermes Number	22894
Property Number	

Physical Conditions

Private land

Melway Ref: 33 A11-B10

Setting/Position: A row of approximately 35 trees on the east side of High Street, scattered along the front boundaries of houses 126, 128, 130, 132, 136 & 138 High Street. A number of these appear to be self-sown seedlings.

No. of trees: 35

Height: 15-20m (average)

Canopy Spread (m) E-W: 8m (average)

N-S: 8m (average)

DBH: Varied

Approx. Age of Tree: 80 years

TPZ: 10.5m **CRZ:** 3.0m

Should development occur within 30m of any of the trees, individual trees affected should have TPZ's calculated. Assess using the Matheny & Clark method of calculation, based on individual trunk diameters and trees with moderate tolerance to development pressures.

Category of Significance:

Location or context

Historic value

Level of Significance: Local

History: The row of pine trees is evident at a large size in the 1945 aerial photograph, where at their northern extremity they also continued onto the other side of High Street. Orchards were located to the trees' east. While the trees once formed a complete row with only one break, there are now a large number of gaps within the plantings.

Source: 1945 - aerial photograph

Health:

Dead wood

Dieback

Rot

Other/Notes: Minor canopy deadwood, with some dead limbs. Some canopy dieback, particularly within seedlings. Minor rot associated with pruning points.

Health Rating: 3

Threats/Risks to Tree: Any future works to the streetscape and/or residential front gardens. High street has recently undergone quite significant streetscape works with road widening; however it is unknown whether any trees were lost during this process.

Hazards/Risks:

Irregular branch structure

Other/Notes: Some crossed limbs and dead branches within canopies.

Structure Rating: 4

Recorded by: Susan Tallon

Date: 21-01-03

ID Confirmed: Susan Tallon
