Statement of Significance

Last updated on -

National Estate Register:

The Lethbridge Railway Station is one of a notable group of stylistically similar railway station erected in 1862 on the Geelong Ballarat line. This structure is an excellent example of country railway station architecture of the 1860s in Victoria, designed by talented and innovative Railways Department architects and at a time of great railway building activity in the State. The Ballarat-Geelong line, which opened on 10 April 1862, includes important viaduct structures at Moorabool and Batesford. (The Commission is in the process of developing and/or upgrading official statements for places listed prior to 1991. The above data was mainly provided by the nominator and has not yet been revised by the Commission.

National Trust:

CITATION

Fine bluestone building on one of the earliest link routes in Victoria.

Physical Description 1

National Estate Register:

The Lethbridge Railway Station on the Geelong-Ballarat line was erected in 1862 by contractors John Campbell and Company from designs prepared by Victorian Railways architects. This regular coursed, squared basalt structure in the Victorian Italianate style consists of a part two storey station office, residence, lamp room and toilets with timber verandah over the platform.

Integrity

Condition and Integrity:

The Lethbridge Railway Station was extended by construction of a weatherboard kitchen and wash house prior to 1923. Minor internal alterations have also been effected, otherwise the structure is intact. A bus service has replaced the passenger train network.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
