Statement of Significance

Last updated on -

The former Stallwood house at 8 Monaro Road, Kooyong is locally significant architecturally:

- as one of the early group of published architect designs in the suburban Old English manner which was to be popularised in the middle suburbs during the following decade.

Study/Consultant Associates, 2003;

Construction dates 1930,

Architect/Designer Beedham, Eric,

Other Names 8 Monaro Road, Malvern,

Hermes Number 31275

Property Number

Physical Description 1

(as assessed from the street)

This gabled and hipped roof, two-story Old English style house has stuccoed walls (originally sand finished) and half-timbered gable ends, Marseilles pattern terra-cotta roof tiles, timber-framed casement windows with diamond pane lead lighting (originally `bottle glass') and timber shutters, clinker brick feature elements such as the entry porch and chimney capping, and crazy or random paving to the entry and driveway median strip. The main elevations (east and north) followed on from those used in the Federation, Queen Anne and English Domestic Revival styles, with the projecting gabled room bays as the main elevation element, with extended gabled rooflines reaching from the upper level eaves to the lower to produce the traditional attic form. The `loggia' shown on plan at the north-east corner is framed by the hand-hewn oak brackets typical for the style. `The Australian Home Beautiful' of 1931 noted the front door as a `sturdy affair in oak', oak being also used for wall panelling and other joinery internally

Integrity

(as assessed from the street)

The street view is largely unchanged form the 1930s photographs, but the sand finish has been painted over and other minor details modified.

Physical Description 2

Interior

`The Australian Home Beautiful' of 1931 stated that oak was used for wall panelling and other joinery internally, such as the shelf to the `texture' brick fireplaces. The fireplaces were set at an angle across the corner of the main rooms, typically for the era. It also noted the clever use of the entry and stair hall for front and rear entrances, the latter from the garage (since demolished). The published plan also had a `loggia' shared by the dining and living rooms, a device typically used in Mediterranean or Italian Villa style houses but obviously also a useful element in the Old English style. The kitchen opened into the dining room and connected to the maid's room, by then a rare item in house design. Upstairs there were three bedrooms, sewing room, bathroom and a generous north facing balcony to the master bedroom. Ample built-in furniture was provided.

Local Historical Themes

8.4.1 Houses as a symbol of wealth, status and fashion 8.1.3 The end of an era - mansion estate subdivisions in the twentieth century
