## Statement of Significance

Last updated on -

Castleton at 54 Stanhope Street, Malvern, is locally significant architecturally and historically:

- for the distinctive parapeted detached 'row house' form, being uncommon within the City's 19th century residential development (Criterion B2)[1];

- synonymous with its stylistic group, 'Boom Style', the house was the product of a speculative builder during the famous Land Boom period of Melbourne's history.

---

## Reference

[1] Graeme Butler & Associates maintain that the contribution to a rare row house group is a major element in the significance of this place while also recognising that the group should also be recognised in the planning scheme..

Heritage Study/Consultant	Stonnington - Heritage Overlay Review - Amendment C5, C6, Graeme Butler & Associates, 2003;
Construction dates	1888,

## Physical Description 1

*(as assessed from the street)*

Like number 48, this single storey brick and stucco house has a parapeted and balustraded facade, with Italian Renaissance detailing consisting of an arched raised entablature with the shell motif, the house name set in a panel, multiple eaves brackets with rosettes between, masks and scrolls to either side of the raised entablature and masks and consoles terminating the main entablature. Chimney cornices are typical of the era, while behind the parapet are hipped roof forms. Additional detail includes vermiculated panels to the parapet piers and a surmounting acroterion to the parapet arch. Two double-hung windows and a small statuette niche plus the front door (with its side and top lights) are on the north facade, under the front verandah; the projecting bay has three double-hung segment-arched windows. The verandah has an ogee roof form, clad with corrugated iron, and ornamental iron supports with derived Corinthian capitals and a cast-iron frieze; the floor is paved with encaustic mosaic tiles.

## Integrity

*(as assessed from the street)*

The bricks have been painted, a low flat-roof carport addition placed on the east side, a bayed projecting room added on the west, and high front and side fences erected. The roof has been tiled. The front yard has been paved

## Local Historical Themes

8.2.2 'Country in the city' - suburban development in Malvern before 1920 3.3.3 Speculation and land boomers - subdivision from 1880s onwards
