Statement of Significance

Last updated on - July 10, 2008

LOCAL SIGNIFICANCE: The site represents a good visual example of the enormous amount of manual labour that went into the provision of Victorian Railways branch lines to service Victorian industry (coal mining) in the late 1800s.

Interpretation of Site	The viaduct is part of a series of side-cuts, cuttings and viaducts that mark the Jumbunna-Outtrim railway line. The source of the large quantities of earth used is visible in the landscape, in the borrow pits and adjacent cuttings.

History

In 1894, the Jumbunna Coal Mining Co commenced operations at Jumbunna, and was serviced by a Victorian Railways branch line from the coal creek (Korumbarra) branch line. This line was later extended 2 3/8 miles from the Jumbarra township terminus to Outtrim and opened on 5th February, 1896. A deep gully between Jumbunna township and the Jumbunna mine had to be spanned, and a large earthen viaduct was constructed. This was a considerable feat, accomplished with manual labour.

This place/object may be included in the Victorian Heritage Register pursuant to the Heritage Act 2017. Check the Victorian Heritage Database, selecting 'Heritage Victoria' as the place source.
