Statement of Significance

Last updated on - November 16, 2004

What is significant?

The Mildara Blass Distillery at Merbein, founded by William Benjamin Chaffey consists of a distillery, boiler house, brandy store, and cask store of concrete, timber and corrugated iron, and a concrete water tower all constructed in 1913. The distillery contains its original copper pot stills and timber vats although the original boilers have been replaced. Mildara brandies and sherries produced on the site have been widely known for their quality. Chaffey, one of the principal architects of the Mildura Irrigation settlement, was associated with the distillery and winery until his death.

How is it significant?

The Mildara Blass Distillery is historically, scientifically and socially important to the State of Victoria.

Why is it significant?

The Mildara Blass Distillery at Merbein is historically and socially important as the oldest operating distillery and winery in Victoria's most important irrigation settlement. The distillery and its machinery are important for their contribution to an understanding of an ongoing tradition of grape growing and processing in the semi arid north west of the State.

The distillery is of technical interest because of the process of distillation of grapes for brandy and the fortification of wines has been carried out continuously at the site since 1913 with the same equipment.

The Mildara Blass Winery at Merbein is significant for its historical associations with its founder and builder William Benjamine Chaffey (1856 - 1926) one of the principal architects of the Mildura Irrigation settlement.

The distillery buildings and water tower at the Mildara Blass Winery are architecturally and technologically notable for their early (1913) use of reinforced concrete in the walls and columns, as well as for the way in the sloping site was utilised to allow for the storage area to be dug into the hillside and the ash of the boilers to be disposed of over the cliffs.

Permit Exemptions

General Exemptions:

General exemptions apply to all places and objects included in the Victorian Heritage Register (VHR). General exemptions have been designed to allow everyday activities, maintenance and changes to your property, which don't harm its cultural heritage significance, to proceed without the need to obtain approvals under the Heritage Act 2017.

Places of worship: In some circumstances, you can alter a place of worship to accommodate religious practices without a permit, but you must **notify** the Executive Director of Heritage Victoria before you start the works or activities at least 20 business days before the works or activities are to commence.

Subdivision/consolidation: Permit exemptions exist for some subdivisions and consolidations. If the subdivision or

consolidation is in accordance with a planning permit granted under Part 4 of the *Planning and Environment Act 1987* and the application for the planning permit was referred to the Executive Director of Heritage Victoria as a determining referral authority, a permit is not required.

Specific exemptions may also apply to your registered place or object. If applicable, these are listed below. Specific exemptions are tailored to the conservation and management needs of an individual registered place or object and set out works and activities that are exempt from the requirements of a permit. Specific exemptions prevail if they conflict with general exemptions.

Find out more about heritage permit exemptions [here](#).

Specific Exemptions:

General Conditions: 1. All exempted alterations are to be planned and carried out in a manner which prevents damage to the fabric of the registered place or object. General Conditions: 2. Should it become apparent during further inspection or the carrying out of works that original or previously hidden or inaccessible details of the place or object are revealed which relate to the significance of the place or object, then the exemption covering such works shall cease and the Executive Director shall be notified as soon as possible. Note: All archaeological places have the potential to contain significant sub-surface artefacts and other remains. In most cases it will be necessary to obtain approval from Heritage Victoria before the undertaking any works that have a significant sub-surface component. General Conditions: 3. If there is a conservation policy and plan approved by the Executive Director, all works shall be in accordance with it. Note: The existence of a Conservation Management Plan or a Heritage Action Plan endorsed by Heritage Victoria provides guidance for the management of the heritage values associated with the site. It may not be necessary to obtain a heritage permit for certain works specified in the management plan. General Conditions: 4. Nothing in this declaration prevents the Executive Director from amending or rescinding all or any of the permit exemptions. General Conditions: 5. Nothing in this declaration exempts owners or their agents from the responsibility to seek relevant planning or building permits from the responsible authorities where applicable.

DISTILLERY

Removal, replacement or refurbishment of boiler provided that such works do not damage or alter the building.

Minor modifications to the operation of the copper pot stills provided that such works do not result in changes to their appearance or location.
