Masson Road,, PARKVILLE VIC 3010 - Property No B6755

Municipality

MELBOURNE CITY

Level of significance

State

Heritage Listing

National Trust

Statement of Significance

Last updated on - December 14, 2006

The Chemistry Building is of state historical and architectural significance as a distinctive modern interpretation of a collegiate Gothic style. The building was designed in the modern Gothic style by Percy Everett in 1938. Its cream brickwork, bold massing and tower decoration are notable.

The Chemistry Building forms part of a major phase of expansion at the University in the 1920's and 1930's. It also demonstrates the importance given by the university to the opinions of a range of experts, including chemists, during the inter-war period.
