Municipality

BOROONDARA CITY

Level of significance

State

Victorian Heritage Register (VHR) Number

H0380

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 21, 2007

The ornamental overhead tram-wire structures on the Wallen Road Bridge and the Hawthorn Bridge are of State significance as a rare and decorative remnant of the early phase of electric tramway development in Melbourne. Built by the Hawthorn Tramways Trust in 1916 with the construction of their two lines connecting Hawthorn and Camberwell with the city, they are also one of the more prominent reminders of the many independent suburban electric systems that operated before their amalgamation into the Melbourne and Metropolitan Tramways Board. The structures along with those erected on Victoria Road Bridge, Kew by the Prahran and Malvern Tramways Trust, exhibit a unique method of holding up the electrified wires. The supports also reflect the ornamental design of 19th and early 20th century street furniture, now relatively rare.
