Statement of Significance

Last updated on - December 19, 2005

Church Statement of Significance: A substantial church comprising nave, tower base, transepts, apsidal chancel and vestry, designed by Purchas & Swyer and built from 1854-57, enlarged in 1874 and 1881 to the design of Sydney W Smith. The material is a rarely-used sandstone from Point King, Sorrento, and the building is of interest for its triangular western rose window, possibly inspired by Lichfield Cathedral, spacious chancel with intact stencilling, stained glass by Ferguson & Urie, Taylor, Montgomery and Brooks Robinson, and organ by Hill & Son, London, installed in 1859.

Church Classified: 'Local' 15/10/1970.

Revised: 'State' 09/03/1989

Organ Statement of Significance:

What is significant? The pipework, windchests, wind system, console, action and casework of the pipe organ built in 1859 by Hill & Son, London and enlarged in 1916-17 by Meadway & Slatterie.

How is it significant? The organ is significant for historic and aesthetic reasons at a state level

Why is it significant? The pipe organ at Christ Church, St Kilda is significant for the following reasons:

It was the first substantial organ to be installed in the suburbs of Melbourne

It is the oldest substantial organ in Melbourne

It retains all of the 1859 pipework

It was the first church organ exported to Australia by the illustrious London firm of Hill & Son

William Hill (1789-1870) was responsible for the building of the organ: he was the most important organbuilder in Britain at the time.

The original design incorporated a complete Great chorus up to Sesquialtera 3 ranks and Trumpet

The original reeds (Great Trumpet, Swell Cornopean) are among the oldest reed stops in the state

The casework is based upon a design by William Butterfield prepared for the 1856 work *Instrumenta Ecclesiastica*

Classified: 'Regional' 19/10/1989
