National Trust

Statement of Significance

Last updated on - December 2, 2005

Built 1857 by Public Works Department, a simple 2 cell rectangular building built of sandstone. This masonry is unusual in being finished to a fair face and then picked over to give an unusual if crude effect.

It is also unusual in that the interior is lined in timber - heavy sawn planks for walls and floors and logs for the ceiling.

It is the oldest stone lock-up that we have dates for.
