Station

Location

Hornsby Street,, MALDON VIC 3463 - Property No B4845

Municipality

MOUNT ALEXANDER SHIRE

Level of significance

Regional

Heritage Listing

National Trust

Statement of Significance

Last updated on - July 24, 2007

The station building was erected in 1888 for the Victorian Railways Department. It is one of eleven similar designs, the remaining ten being located in the metropolitan area.

The plan of the building is symmetrical, about the axis of the booking lobby. To one side are situated the station offices, whilst to the other are the general and ladies' waiting rooms. The ladies' toilets, situated within a corrugated iron enclosure, have been removed. One of the Department's standard cast iron verandahs runs along the platform elevation.

A departure from earlier classically derived station architecture, it features pointed arch windows with rendered hood moulds and gabled entrance with a quatrefoil motif.

Maldon is an excellent example of gothic revival style railway architecture as it was practised in this state.
