National Trust

Statement of Significance

Last updated on -

Remnant native vegetation
Rare or localised, disjunct community

Located 2.5km west of Allendale and 800m west of the Creswick-Lawrence Road, this is a very old isolated tree in the corner of a grazing paddock. The tree is probably 200 years old and growing on basalt derived soils over the famous Berry Deep Lead gold field.

Snow Gums (*Eucalyptus pauciflora*) are more typically found in high mountain areas at the snow line.

Measurements: 16/06/2012
Spread (m): E-W 12.6; N-S 16.1
Girth (m): 5.28

Height (m): 9.8
Estimated Age (yrs); 200 approx
