## Statement of Significance

Last updated on - June 16, 2008

Rare or localised  
Aesthetic value

The population was first described in 1934 by Blakely as *E. maidenii* var. *williamsonii*. There are 39 trees recognised (1982), all occurring in the Mallacoota township area and so have been dubbed the 'Mallacoota Gums' by the locals. These are the only known hybrids between these two parents, and are a most attractive looking tree.

See article "*The Relationship of Some Populations involving Eucalyptus cypellocarpa and E. globulus to the Problem of Phantom Hybrids*". Kilpatrick, J.B., Simmon, D. and Parsons, R.F. (1973) *New Phytol.* 72, 867-876

The tree is located in the Mallacoota Sportsground and Camping Park, Develing's Gulch, Mallacoota.

Measurements: 22/11/1996

Spread (m): 36.6

Girth (m): 8

Height (m): 27.5

Est. Age (yrs): 200

Condition: Fair

Measurements: 12/03/2020

Spread (m): 37.2

Girth (m): 9.83

Height (m): 31

Est. Age (yrs): 150-200

Condition: Good

Access: Unrestricted

Classified: 09/12/1982

Other Names      Mallacoota Gum,

Hermes Number 70517
