National Trust

Statement of Significance

Last updated on - June 16, 2008

Contribution to landscape
Rare or localised

This is an important stand of trees located in the main street of Mallacoota and is a well known landmark contributing significantly to the landscape. Due to uncontrolled parking and the resultant soil compaction many of the trees show terminal dieback.. *Angophora floribunda* is widely distributed in south-eastern Queensland throughout eastern New South Wales apart from the northern coast, and extends just into this area of Mallacoota

Measurements: 06/1984
