State

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 18, 2008

Rare or Localised:

A tree of a species or variety that is rare or of very localised distribution

Outstanding Size:

A tree outstanding for its large height, circumference and canopy spread

Outstanding Example of Species

A single specimen located near the track, this tree is the largest example of a stand of about 40 trees located in the gullies of Harrisons Creek. This stand represents the only known occurrence of the species in Victoria, mainly occurring along the coastal ranges north to Kiama in NSW. The tree is notable for its glossy green pinnate leaves and clusters of white flowers. Tree is located on the Western Arm Harrisons Creek, Black Hole Road about 1km

from junction with Buckland Road.

Measurements: 21/09/1996
