## Statement of Significance

Last updated on - June 7, 2004

### Curious Growth Form

Known locally as the 'Bottle Tree', this specimen is notable for its unusual gall formation at the base of the trunk. Diameter of gall: 2.25m; length of gall: 2.6m. While these trunk growths are not unusual, this example is the largest surveyed in Victoria. The growth is separate from the main trunk and has decayed inside. The tree has also lost its crown and the tree is in a generally declining state. The tree is on the Bonang Highway, above a disused gravel pit, 1.9km before the Gap turnoff to Bendoc, when heading towards Bendoc from Goongerah.

Measurements: 15/10/1993

Spread (m): -

Girth (m): 7.2

Height (m): -

Estimated Age (yrs): 100

Condition: Fair

Access: Unrestricted

Classified: 11/11/1993

Other Names      Mountain Grey Gum,

Hermes Number    70559
