Statement of Significance

Last updated on - June 7, 2004

Rare or localised
Outstanding size

This *Pinus torreyana* is a very large and dominant specimen growing in parkland surrounding the historic "Mooramong" homestead. There are a total of three Soledad Pines of which two are in poor condition. *Pinus torreyana* was one of the rarest pine species in the world in the early 20th century, and is still considered endangered in the United States.

All the other pines are *Pinus radiata*. This tree has a very large circumference and canopy spread and appears to be of similar age to specimens growing at Bendigo, Castlemaine, Warrnambool and Malsmbury Reservoir. Located north-west of the tennis court.

Measurements: 10/1986

Spread (m): 26.2

Girth (m): 5.32

Height (m): 28.5

Estimated Age (yrs): 90

Measurements: 09/10/2010

Spread (m): E-W 26, N-S 25

Girth (m): 6

Height (m): 30

Condition: Good

Access: Restricted

Classified: 13/11/1986

Other Names Soledad Pine,

Hermes Number 70594
