Statement of Significance

Last updated on - June 16, 2008

Rare or Localised:

Five trees of a species or variety that is rare or of very localised distribution.

Listed as endangered in Victoria, the only other known occurrence of the species is in the Warby Ranges near Springhurst in north-east Victoria. This stand comprises five established trees and numerous suckers (30+) growing on a sandy ridge amongst Bursaria, Malle Eucalypt, Dodonea and Eucalyptus camaldulensis. Measurements for single-trunked tree near side track. A tall multi-trunked specimen occurs at the track junction. One large tree is infected with mistletoe (two Amyema species on one plant).

The trees are located on the riverbank, at Boundary Bend, 200m west of rest stop,

Measurements: 29/08/1992

Spread (m): 1.6

Girth (m): 0.23

Height (m): 5.5

Estimated Age (yrs): 60

Condition: Good

Classified: 12/11/1992

Other Names Northern Sandalwood,

Hermes Number 70678
