Statement of Significance

Last updated on - June 16, 2008

Rare or localised

This is a stand of approximately 400 trees, both juvenile and mature, and is the only known occurrence of this species in Victoria. It appears to be an isolated pocket in the midst of forest of Mt Grey Gum, Shining Gum, Red Box, Silvertop, White Stringybark.

Corymbia maculata normally occurs along coastal and subcoastal New South Wales from the Manning River valley south to Bega.
