Location

Henty Highway,, WARRACKNABEAL VIC 3393 - Property No T11216

Municipality

YARRIAMBIACK SHIRE

Level of significance

State

Heritage Listing

National Trust

Statement of Significance

Last updated on - June 16, 2008

Rare or localised

Acacia pendula is an endangered species in Victoria, the only other known stand, occurs at Murphy's Swamp, Echuca East. It normally occurs in the dry outback areas of Queensland and NSW. When inspected in the early 1980s by Neville Walsh, Royal Botanic Gardens, there were 8 trees; today only 3 mature trees remain and several young saplings occur along the irrigation channel. Urgent conservation action is required. The NW tree is in the best condition with a full canopy exhibiting the full pendulous nature. This tree is located on private land, Henty Highway, opposite Warracknabeal Aerodrome, 10 km out of township.

Measurements: 14/07/1992 (SE tree)

Spread (m): 14.3

Girth (m): 1.96
Height (m): 11.5
Estimated Age (yrs): 100
Condition: Fair

Access: Restricted
Classified: 12/08/1992

Other Names Weeping Myall,

Hermes Number 70720
